

Taurai Paris Baiwa

Computer Science Undergraduate

Maharashtra, India | +91 97647 87953 | tauraiparisbaiwa@gmail.com
linkedin.com/in/taurai-paris-baiwa | github.com/tauraiPbaiwa-bit

PROFILE

Computer Science undergraduate with a 9.49/10 CGPA and hands-on experience in Python, SQL, PL/SQL, and relational databases. Built an ETL pipeline and a full-stack churn prediction application, comparing three models with ROC-AUC up to 0.8392. Seeking opportunities in data engineering and analytics.

EDUCATION

Bachelor of Science (BS), Computer Science

Vishwakarma University, Maharashtra | Jul 2024 – Present

CGPA: 9.49/10 through Semester IV

Relevant coursework: Database Management Systems, Data Structures, Object-Oriented Programming, Data Mining and Analytics, Artificial Intelligence for Data Science.

TECHNICAL SKILLS

Programming

Python, SQL, PL/SQL, Java

Data Engineering

ETL, Pandas, web scraping, data modeling, data warehousing, star and snowflake schemas

Database Development

Schema design, stored procedures, query optimization

Databases

Oracle, MySQL, SQLite, MongoDB

Machine Learning

scikit-learn, XGBoost, Random Forest, Logistic Regression, SHAP

Development and Analytics

FastAPI, React, REST APIs, Git, Power BI

SELECTED PROJECTS

Customer Churn Prediction System

Python / FastAPI / React / MongoDB / scikit-learn / XGBoost / SHAP

- Built a full-stack application for dataset uploads, OLAP-style analysis, and individual and batch churn predictions through a REST API and React dashboard.
- Compared **three classification models**. Random Forest achieved **0.8392 ROC-AUC** and **77.79% accuracy** in the recorded evaluation.
- Achieved **78.76% recall** and **0.6188 F1** with Logistic Regression; displayed accuracy, precision, recall, F1, and ROC-AUC to support model comparison.
- Integrated SHAP-based explanations and stored datasets, models, and prediction history in MongoDB.

Bank ETL Pipeline

Python / Pandas / Requests / BeautifulSoup / SQLite / SQL

- Developed a pipeline through IBM data engineering coursework to extract global bank market-capitalization data using web scraping.
- Transformed values across **four currencies** (USD, GBP, EUR, INR) and loaded results into **CSV and SQLite**, with logging at each ETL stage.

INDUSTRY PROJECT EXPERIENCE

Retail Sales Performance Tracking and Analysis

TCS iON Applied Industry Projects | Feb 2026 – May 2026

- Completed a industry-mentored project using SQL and PL/SQL to analyze retail sales and identify business trends.
- Optimized data-extraction queries and developed executive dashboards to communicate sales performance.
- Standardized reporting procedures and translated findings into stakeholder-ready recommendations.

CERTIFICATIONS AND COURSES

IBM — Python Project for Data Engineering; Introduction to Relational Databases (Sep 2026)

IBM — Python for Data Science, AI & Development; Introduction to Data Engineering (Aug 2026)

TCS iON — Sales Order Management in Supply Chain Management; Data Modelling and Visualization

Oracle — Oracle Database Explorer
